

Portugal sable energy

What percentage of Portugal's energy consumption comes from renewable sources?

In 2016, 28% of final energy consumption in Portugal came from renewable sources. Portugal aims to be climate neutral by 2050 and to cover 80% of its electricity consumption with renewables by 2030.

Are renewables the future of electricity in Portugal?

In the electricity sector, renewables hold a much larger share. Portugal's renewable power capacity has been growing steadily in the last years, surpassing 18 gigawatts in 2023. This represents a share of over 86 percent of the total installed capacity in the country. This growing trend is expected to accelerate in the upcoming years.

How much energy does Portugal use in 2023?

In 2023, the country's primary energy consumption stood at 0.95 exajoules, with renewables accounting for over 35 percent of that amount. In the electricity sector, renewables hold a much larger share. Portugal's renewable power capacity has been growing steadily in the last years, surpassing 18 gigawatts in 2023.

Is Portugal a good renewable leader?

Portugal had the third highest share of wind energy in its electricity mix last year at 29 per cent, behind Ireland (36 per cent) and Denmark (58 per cent). But, as elsewhere, it's no good a renewable leader resting on its laurels.

How can Portugal meet growing energy demands in a sustainable way?

Meanwhile, the rapid expansion of hydroelectric and solar energy capacity is helping Portugal meet growing energy demands in a sustainable way. These efforts align with European Union objectives, such as the RePowerEU plan and the Renewable Energy Directive, which targets 42.5% renewable energy in total consumption by 2030.

What percentage of electricity is produced in Portugal?

In 2019, electricity covered 25% of the total final energy demand, 56% of building energy demand, and 25% of industry energy demand, according to IEA. A significant portion of the electricity in Portugal is produced through a renewable source, over 50%. Wind power amounted to 24% of the electricity production.

Portugal had the third highest share of wind energy in its electricity mix last year at 29 per cent, behind Ireland (36 per cent) and Denmark (58 per cent).
