

Is re a solution to energy problems in the Gambia?

Policy makers across africa have been among the last to embrace Re as a solu-tion to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that Re has a real futurein the energy mix of The Gambia. They need to demonstrate this by their actions.

Why is energy important in the Gambia?

The availability of adequate,reliable,affordable and sustainable energy is a critical milestone in the socio-economic developmentof any country. While less than half of all households in The Gambia have access to elec-tricity,over 90% are still dependent on solid biomass for cooking and heating. This has intensified poverty.

Will re be a part of the Gambia's energy future?

The Gambia has already started this process by setting up a strong policy that includes Re as part of its energy future. it is in the process of building the institutional and legal framework that will help to deliver this promise.

Can re resources be deployed in the Gambia?

The RRA identified a large number of issues with decisive implications for the effective deployment of Re resources in The Gambia. Some of these are specific to the five priority resource-service pairs for scaling up renewable deployment in the short- to medium-term. however, some are generic in nature.

Does the Gambia have a wind-related energy project?

There is limited experiencein wind-related energy projects in The Gambia. much of the early work was restricted to village water pumping projects. in the 1990s,the Department of Water Resources (DWR) actively promoted the use of wind pumps along coastal villages with support from the eU.

Should Gambia invest in the energy sector?

Future investment only occurs if there is sufficient confidence that investors today are gaining good returns. The Gambia has an attractive investment environment in tourism and other develop-ment sectors. it needs to broaden this to the energy sector. That means building its own capacity to implement its policies to promote and support Re.
