

Resco solar Israel

What is Resco solar?

The RESCO solar model is an energy service company that provides energy to consumers from renewable energy sources with an authentic concept- Users enjoy the benefits of solar energy without having to pay any upfront costs.

How does Resco sell solar energy?

The RESCO model also sells solar energy through a Power Purchase Agreement (PPA). This is a long-term contract undertaken with the customer by the RESCO organization for 10 to 25 years. The customer's obligation in this scenario lies in buying electricity from the solar system at either fixed or variable prices.

What is the Resco model?

In the field of solar energy, the RESCO model (also known as OPEX based solutions) stands out as an innovative approach that reimagines how we harness the power of the clean energy like solar.

What is Resco solar financing?

In this solar financing model, a third-party service provider (RESCO) owns, installs, operates, and maintains the solar system on behalf of the customer. The RESCO model is often structured as a long-term agreement, typically ranging from 10 to 25 years.

What is a Resco solar power purchase agreement (PPA)?

The RESCO solar model encompasses a harmonious relationship between the service provider (RESCO) and the consumer. Through a Power Purchase Agreement (PPA), the consumer commits to using the energy produced by the solar project and compensates the RESCO at a calculated rate.

What are the advantages of Resco solar?

The RESCO solar model offers several advantages: Zero Investment: Users enjoy solar benefits without upfront capital expenditure. Maintenance Included: RESCOs handle maintenance, ensuring optimal system performance. Cost Predictability: Fixed tariffs provide cost predictability, aiding budget planning.

The solar market in Israel is rising monthly, more and more KW"s are produced by the different solar systems all around the country. The first solar portal, which gathers all the information for the customers and the suppliers, is the Solar ...

RESCO developer finances, installs, operates and maintains the rooftop solar power plant. The developer signs an agreement with the rooftop owner. The rooftop owners may consume the electricity generated, for which they have to ...
