RTR recently completed a 350 acre bathymetric (sonar) survey while a dredging operation was in progress. SSRTR, our little orange remotely operated Bathycat, can be seen in the video against the backdrop of the dredger.

RTR's app capabilities make it possible for us to customize cloud-based app solutions tailored to our client's criteria. Whether your need is for a small boundary line retracement, or a 50-mile-long transmission line base plan, existing and proposed features modeling in 3D, or construction staking of a gas compressor station; RTR has the ...

RTR's surveying department hitched a ride recently aboard a fishing boat with Top Water Marine Guide Service to stake core borings on an island in the Susquehanna River. The existing structures in the photos are to be replaced. Core borings are obtained in the area of new construction to determine the nature and/or thickness of underlying rock and soil. The ...

Alison holds a Bachelor of Arts degree in Geography from Kutztown University, class of 2019. She began her career working through all phases of transmission line construction to maintain environmental compliance. Since joining the RTR team in 2021 Ali has coordinated and conducted E& S (erosion and sedimentation) and PCSM (post-construction storm-water ...
