

# Safely store batteries Georgia

While it is generally safe to store lithium-ion batteries in a garage or basement, it is important to ensure that these areas meet the recommended storage conditions. Make sure the storage space is cool, dry, well-ventilated, and away from any flammable materials. Avoid storing them near heat sources or in areas prone to excessive humidity.

**Tips for Storing Household Batteries.** Store one-time-use batteries in their original packaging so they are not in contact with other batteries. If the original packaging is missing, line up the batteries in a container with all the positive ends facing in the same direction. Do not store batteries with the opposing ends touching one another.

Here's how you can store lithium batteries safely and effectively for the winter months. Avoid Extreme Cold. While lithium-ion batteries can handle cold temperatures better than heat, extremely cold environments can still be harmful, especially if the battery is used or charged at low temperatures.
