But for some of the almost 200,000 people that live on the island, another incredible resource is affecting ...

In my opinion, solar power in Saint Lucia remains in the hands of those who can make a large investment in the long term. For those who at some points cannot even afford the cost of electricity services, investing a large sum into solar panels is not a possibility, even though in the long term it will be consistently cheaper than traditional ...

Unsurprisingly, those clear skies leave 99% of the rooftops in the city solar viable, \* Google, Project Sunroof data explorer (November 2018). ...

You were using solar power! "Solar" is the Latin word for "sun" - and it's a powerful source of energy. The sun provides energy in two forms - light and heat. The sun can be used to heat water and air in our homes and businesses (If you've seen a house with big shiny panels on the roof, that family is using solar power.).
