What is a PV inverter? Anyone can use photovoltaic solar panels to power an off-grid local electrical network or to feed electricity into a commercial electrical grid via an inverter that transforms the DC output to an AC frequency suitable for grid supply. It is an essential part of the photovoltaic system's BOS because it allows for the usage of traditional AC equipment.

Spitzer Energy, the innovative developer of affordable residential and commercial solar energy products, announces a new line of microinverters with increased AC production capability that reduces clipping, allows for longer daytime production, and provides greater DC to AC throughput. "In our recent tests, we have seen a 10% DC to AC production ...
