Could Saltwater batteries reduce global dependence on lithium?

In recent months start-ups and researchers have debuted saltwater battery technologies that promise cheaper capacity to store variable solar and wind power at scale, a development that could help to reduce global dependence on lithium.

Are Saltwater batteries the new blue energy economy?

Saltwater batteries are the latest in a wave of new developments forging a so-called blue energy economy, which seeks to use ocean resources sustainably to drive growth, create jobs and protect vital marine ecosystems.
