Renewable energy in Spain, comprising bioenergy, wind, solar, and hydro sources, accounted for 15.0% of the Total Energy Supply (TES) in 2019. Oil was the largest contributor at 42.4% of the TES, followed by gas, which made up 25.4%. [4] [5] Spain, along with other European Union (EU) States, has a target of generating 32% of all its energy needs from renewable energy sources ...

Renewable energy in Spain. Andasol is the first parabolic trough power plant in Europe, and Andasol 1 went online in March 2009. Because of the high altitude (1,100 m) and the semi-arid climate, the site has exceptionally high annual direct insolation of 2,200 kWh/m<sup>2</sup> per year.

Sama Bilbao y Le&#243;n Yeah, so, Spain has had, for the last, I don't know, 20-30 years, about 20-25% - I mean, it depends on the year, right- but about 20-25% of our electricity comes from nuclear. I think right now, we are down to seven units. But nuclear has been a strong part of the energy fabric in Spain. And frankly, I'm going to brag for a ...

With almost 1,800 employees distributed throughout the national geography, TotalEnergies is present in Spain as a relevant player, both in the private consumer environment and in the professional field, in the generation of renewable electricity, solar and wind energy projects, installation and management of chargers for electric mobility, sale of gas and electricity, ...
