

The EU limit for plug-in solar is 800W, usually done with 2 panels and usually around 500EUR. I'm not sure if Luxembourg is already following EU rules and if creos/enovos actually has implemented a process to deal with those systems. The power station/camping things are definitely not going to make money.

The best way to install solar panels in Luxembourg is to analyse three key factors: Roof pitch : The ideal angle for solar panels in the region is between 25 and 35 degrees to the horizontal, optimising exposure to the sun's rays all year round. Roof orientation South-facing buildings are favoured, offering maximum exposure to the sun, which is essential for maximising solar panel ...
