

# Solar cell equipment New Zealand

Do New Zealanders really need solar energy?

Every year, more and more New Zealanders are choosing to supplement or even outright replace their utility company power supply with clean, green solar energy.

Why is solar power important in New Zealand?

We believe that solar power is a crucial step towards reducing the carbon footprint of New Zealand and making clean energy more accessible. At the same time, we understand that the cost of solar installation can be a barrier for many people.

How many solar systems are there in New Zealand?

As of the beginning of 2021, the Electricity Authority reports that over 30,000 solar systems have been installed on government buildings, businesses, farms and homes - and it's easy to see why. New Zealanders have a lot to be proud of. Our country regularly punches above its weight in agriculture, tourism, sports and, now, solar.

Is New Zealand a good place for solar?

New Zealanders have a lot to be proud of. Our country regularly punches above its weight in agriculture, tourism, sports and, now, solar. Aotearoa has one of the highest solar potentials of any country in the world, beating out parts of even sun-soaked places like Spain. If there was a place in the world perfect for solar, NZ is it.

What kind of batteries do you use for solar panels?

Backed by a 15-year material/technology warranty and a 30-year linear power output guarantee at 87.4% efficiency. We use Lithium Iron Phosphate (LiFePO<sub>4</sub>) batteries which are not only long-lasting but also safer than traditional lithium batteries. They have a lower risk of fire, making them a safer choice for your solar installation.
