Who has installed a 250kW solar PV project in Montserrat?

The awarding of a contract to Salt Energy Company for the installation of a 250KW Solar PV Project in 2018 as the first phase 250KW Solar photovoltaic (PV) Project. The solar PV system was successfully installed and commissioned by the Salt Energy Company and handed over to the Government of Montserrat in March of 2019.

Why do we need solar panels in Montserrat?

The use of Solar Panels meets one of the Government's priority needs which is to improve energy security by slowly transitioning to renewable energy. The incorporation of Solar into the Grid on Montserrat, resulted in a 13% renewable energy input on the grid, which is 3% above the European Union's key performance indicator (KPI) of 10%.

Where is the 40 MW Eldosol solar PV project located?

The 40 MW Eldosol Solar PV project is located in the Plateau area, close to Eldoret City in the North-Western part of Kenya. The project achieved Commercial Operation date in August 2021 and is currently in operations. Frontier Energy II is majority shareholder in the project company, Cedate Limited. Key contributions have been:

What is Montserrat's energy policy?

The first Energy Policy was approved in 2008 by the Government of Montserrat. The policy was then revised and updated in 2016 to include Government incentives and to update the policy with appropriate targets. The new Energy Policy (The Power to Change) that is currently being implemented runs from 2016 to 2030. Progress made so far includes: -

Where were solar panels installed?

The units were installed on three buildings; MCW workshop, the Brades power Station and the Factory Shell Buildings commonly referred to as the Montobacco building. The use of Solar Panels meets one of the Government's priority needs which is to improve energy security by slowly transitioning to renewable energy.

Why should Montserrat buy a new electric vehicle?

The purchase of the vehicle supports the Government's aim to promote the development of electric, hybrid electric and advanced vehicle technologies for Montserrat. A pilot project was commissioned to review the performance of the technology under local conditions and get feedback of driver's acceptability.
