Does solar control offer free UK shipping?

FREE UK SHIPPING! SHOP TODAY Protect Your Property With Our Window Film Installation Company based in County Durham, covering the whole of the uk. Solar Control provides a premium installation service for professional window film in residential and commercial properties.

Who makes solar control glass in the UK?

There are two main manufacturers of solar control glass in the UK right now: Saint-Gobain and Pilkington. In terms of effectiveness, it is difficult to find a difference between the two, and both offer products with a tinted, mirrored or clear appearance.

Is solar control window film worth it?

To get a complete understanding of the cost and value of solar control window film, it's also important to fully understand the benefits that an application of film delivers. For example, by reducing the internal temperature, the reliance on expensive air conditioning is also lessened, in turn cutting energy costs.

Can solar control glass be used for high-rise buildings?

Solar control glass can be used for both high-rise buildings and houses. When a single window in a high-rise building allows plenty of sunlight, then solar control glass could be a cost-effective option in the long run. For any building where overheating is an issue, solar control glass would be a great idea.

How much does a double glazed solar system cost?

A double-glazed unit with Low-E glass is likely to cost under  $\pounds 50/m^2$ , while that same unit with an outer pane of solar control glass is likely to cost in excess of  $\pounds 130/m^2$ . As for the retrofitter, this cannot be considered a DIY job, as the pane has to be incorporated into a double-glazed unit, with that unit then being fitted into a frame.

Is solar control glass a good option?

For buildings where overheating is an issue, solar control glass could be a cost-effective option in the long run. Solar Control Glasses are great ideas for such situations.

Control temperatures in your space with our solar control window film. If you're looking for a cost effective way to keep your home warm during winter, or to reduce heat during summer, solar control film is your answer.

How Much Does Solar Control Glass Cost? Currently, solar control glass is available as clear glass, tinted in a variety of tones, or with a mirror finish, and is inarguably effective at what it is intended to do. However, ...

Whereas the same unit with an outer pane of solar control glass would cost more than  $\pounds 130/m^2$ . Solar

The UV protection provided by solar control glass can help to prevent such fading, so you won't be left wondering how to either turn up the hue on the faded side, or bleach the rest of it! The cons of solar control glass: 1. Solar control glass costs more than normal glass: One of the main drawbacks of solar control glass is the cost.

The g-value ranges from 0 to 1, with 0 representing no solar heat gain and 1 representing the maximum possible solar heat gain. It is calculated by dividing the total solar heat gain by the incident solar radiation received on the surface during a given time. A lower g-value means a lower percentage of solar radiation is allowed through the glass.

The quickest and easiest way to get a cost for solar control film is to contact a member of The Window Film Company's dedicated team on 01494 794477 or by emailing info@windowfilm .uk. Experts are on hand to discuss with you exactly what is required, to recommend the most appropriate solution, to supply samples and of course, to provide the ...

Our solar control glass is applied on clear float glass and has a neutral aspect, allowing more natural, truer views through the glass. However, if you wish, solar control glass can also be colored. Our solar control coatings can be applied on ...

Solar gain through glass and windows can be either a positive or a negative depending on where you live and what time of year it is.. For north-facing windows, using the natural warmth generated from the sun is beneficial to help to heat a room. For south-facing windows, the direct sun can cause excessive overheating and quickly becomes an issue in keeping a room cool.

The most popular of these solar control coatings is a 70/35 solar control coating which maintains the unit's
