To select the right solar panel size, it is important to know the standard solar panel sizes available on the market. Every solar panel consists of solar cells, which are typically 6-by-6 inches.

When it comes to solar panel size, bigger doesn't always mean better. Panels typically come in two standard sizes: 60-cell (smaller, commonly used for residential systems) and 72-cell (larger, often used in commercial settings). While larger panels generate more electricity per unit, they also take up more roof space.
