A brief review of Costa Rica's solar market outlook. Costa Rica, a Central American country, has achieved impressive renewable energy capacity in recent years. In 2019, the nation's renewable energy share hit 99.15%. Looking at this renewable energy share capacity, one may assume that its solar capacity is equally impressive.

In the graphic below we can see the demands of 3 distinct energy systems: no solar, stand-alone solar and solar with battery storage. In the stand-alone and solar storage systems, demand is low mid-day because the panels directly power the user's load. For the stand-alone solar system, power must be purchased later in the day to meet demand.

Introducing Costa Rica Solar Solutions and LG Chem Resu Energy Storage Partnership.
