"The whole team over at Bahamas Solar really knows this business backwards and forwards, they made my customers installs simple and completions on time

A: While solar panels can be installed on almost any type of roof, there is an ideal roof for a solar installation. If done properly, a solar installation should last 25 - 30 years. Consequently, a roof should be prepared to last the same period of time. It is worth noting that a solar panel installation can extend the life of your roof.

As a country with an abundance of sunshine, The Bahamas is slowly but surely taking advantage of all the benefits that come along with solar energy in terms of improving the country and livelihood of its citizens fact, The Bahamas has about 340 sunny days a year!
