business makes good sense.

About Me. My name is James "Jamie" Marchitello and I got into solar while studying mechanical engineering at Rutgers. After I graduated in 2006, I noticed a lot of my neighbors were over paying for solar systems and thus started Solar Power March to help friends and family get systems installed at a fair price.

With over 50 years of combined industry experience, our team has successfully installed thousands of solar systems for residential and commercial clients across New Jersey. We are committed to excellence, as evidenced by our three Gold ...

Your array should be grounded with a grounding rod at the array. May be different if rooftop mounted. For the inverter and batteries, the NEC I believe now says that 2 grounding rods into the ground, at least 10 feet apart are connected together by a single wire like bare 6 AWG and brought into the inverter site.
