

Solar powered cold rooms in Nigeria

With our guidance, you can get whatever you need to start a successful solar powered coldroom in Nigeria as we have affordable solar-powered cold room solutions. Our solar-powered cold rooms are not only effective and pocket-friendly, but very sustainable for your frozen food business. You also stand the chance of enjoying the following:

Power Your Home with Beautiful Solar Get Started Today! Solarcool seeks to stimulate off-grid cold chain refrigeration for Agribusiness value chain and related businesses in sub-Saharan Africa, enabling better experience in the industry.

With ColdHubs, entrepreneur Nnaemeka Ikegwuonu is building and operating walk-in cold rooms that may help Nigerian farmers and vendors to store and preserve produce better.. According to the U.N. Food and Agriculture Organization (FAO), agriculture employs two-thirds of the entire labor force in the country.. But food loss continues to plague the sector.

The cold room incorporates 120mm insulating panels to retain the cooling. Energy from roof-mounted solar panels is stored in high-capacity batteries which feeds an inverter that in turn feeds the refrigerating unit. The cold rooms are installed in farms and markets where farmers and vendors can rent reusable crates to store their fresh produce.

ColdHubs are 10-foot-square solar-powered cold storage units that have been installed at markets and farms in Nigeria. ... and wholesalers use its cold rooms and in 2020, the company stored 40,000 ...

FreezeCold is the leading sustainable energy-powered HVAC & R manufacturer and solutions provider based in Nigeria. Our primary motivation is to manufacture sustainable and energy-efficient, solar cold room and HVAC & Refrigeration solutions, running off-grid, available to rural and urban communities at affordable prices. Our vision at FreezeCold is to design, and ...

The cold energy is sent to the storage room using an ultra-low power consumption pump. A heat exchanger and a control system guarantee reliable cold transfer and air distribution to the storage room. With the solar-powered Cold Room, different products can be cooled down independently of any infrastructure using only the sun's energy.

These systems can automatically switch over to grid electricity if thermal energy storage is depleted below a minimum level. These systems can be configured by the end user in the temperature range of -4 to 15 C. Inficold design and manufacture solar powered cold storage in both container and indoor cold room options.

Key Features of our Solar-Powered Cold Room and Blast Freezer: Solar-Powered Efficiency: Our

Solar powered cold rooms in Nigeria

cutting-edge refrigeration units are powered by solar panels, harnessing the natural energy of the sun to ensure ...

The refrigeration system operates an average seven hours a day and offers a cooling capacity of 40-45kW (11.4-12.9TR) to keep the cold room temperature at 5°C (86°F). Energy is supplied exclusively by solar PV for 50% of the days in long-term average with a solar fraction of power supply greater than 80%.

The company's cold rooms are powered by solar energy, a clean and renewable resource, making them ideal for regions with limited electricity access. This innovation not only reduces the carbon footprint of food storage but also provides a reliable and cost-effective solution to farmers in rural areas.

agro-perishable produce. TAGE has one 45-ton cold store in Northern Nigeria, but at the farm gate. Cold Hubs is also an indigenous cold store enterprise with over 10 solar powered cold stores across the South Eastern part of Nigeria, serving the low-income communities. Bank of Industry is the foremost indigenous development bank in Nigeria

Mobile Cold room Explained by a Nigerian Manufacturer | Expert Perspective on Understanding Cold Storage Chain | Why Solar Powered Cold room is a Smart Choice | The 4 Avoidable Reasons Why Frozen Food Operators Close Down | How to Set Up a Profitable Frozen Food Business in Nigeria | HVAC and Refrigeration - An Essential Sector in Nation ...

Prices of Cold Rooms in Nigeria. Cold rooms are very common in Nigeria and they are mostly used by people in the meat and fish selling business. The prices of cold rooms depend on two major factors. These factors include: The artificial temperature setting. The size or capacity of the cold room.

Through its pioneering 'pay-as-you-store' system, small-scale farmers can safely store produce in solar-powered walk-in cold rooms, extending the shelf life of perishable goods from two to 21 days and cutting post-harvest loss by 80 percent. ... Were ColdHubs to win the Food Planet Prize, it would build 40 new cold rooms in Nigeria. The numbers ...

Small-scale farmers and entrepreneurs in Nigeria are recognizing the benefits of solar powered cold rooms in preserving their agricultural produce and reducing post-harvest losses. These cold rooms ...

o Our solar power cold room is designed with sufficient energy yield from the solar panels, enough to drive a cold storage room sustainably. ... FreezeCold, as a solar cold room manufacturer in Nigeria, addresses the problem of high post-harvest losses and considered while taking cognizance of tropical peculiarities of our local environment ...

FreezeCold is rolling-out solar-powered cold room of scalable capacity in Nigeria, as a game-changer, to serve the needs of off-grid individuals and businesses who are ...

Solar powered cold rooms in Nigeria

The solar powered walk-in cold room is made of 120mm insulating cold room panels to retain cold. It contains approximately 2 tons of perishable food arranged in 30kg plastic crates, ...

In 2014 we built a solar powered walk in cold room, tested and validated the technology in 11 states of Nigeria. Having achieved success, decided to spin-off the research into a new venture ColdHubs. ... We are currently serving 3,517 users, using our 24 installed cold rooms in sites in Nigeria. 30 more ColdHubs are presently under construction ...

The off-grid box is wired and ready to run, allowing you to take solar-powered refrigeration anywhere in the world. Simply set up the solar panels to enjoy to harness the solar power. To maintain your Aldelano Solar ColdBox(TM), clean the solar panels with a water hose and water the batteries once a month using our on-board easy watering system.

Once again this is a cold room and blast freezer built by AORC Akpo Oyegwa Refrigeration Company over here we have the blast freezer and over here we have the cold room the full length is 20 feet ...

The Nigerian start-up takes on the problem of food spoilage at all steps of the production and distribution chain, one solar-powered cold room at a time. OBINZE, NIGERIA In the courtyard of Obinze Fruit & Vegetable market, haggling has peaked for the morning. Retailers, drawn from far-flung villages and suburbs of Imo state, southeast Nigeria

Ikegwuonu founded ColdHubs on a trip to Nigeria in which he meant to report on Nigerian cabbage markets as a journalist, but found the need for innovation to reduce food spoilage in Nigeria. ColdHubs are "solar ...

Freezecold solar cold rooms are 100% solar powered, with durable and reliable batteries thus they deliver required temperature consistently and around the clock. With zero dependence on the national grid, Freezecold solar-powered cold rooms are ideal for rural ...
