the Fijian Islands and beyond.

The Moon and Mars were the two most likely candidates for life in the solar system; what exists beyond our solar system is mere guesswork. Walter Lang We need to take command of the solar system to gain that wealth, and to escape the sea of paper our government is becoming, and for some decent chance of stopping a Dinosaur Killer asteroid.

Fiji's solar market status Most Pacific Island countries spend vast chunks of their annual GDPs on fuel imports. This is illogical considering that there is no shortage of renewable sources of energy in the Pacific region.
