Who is solarDuck?

Bureau Veritas has awarded Dutch-Norwegian renewable energy company SolarDuck the world's first Prototype Certification for its floating offshore solar technology, as applied in SolarDuck's 0.5 MW pilot "Merganser". It marks a significant step forward in the development of marine renewable energy technologies for offshore applications.

Does Bureau Veritas support solarDuck?

Bureau Veritas (BV) has been actively supporting SolarDuck in its pioneering efforts to develop floating solar solutions. The certification of the Merganser prototype follows the approval in principle (AiP) granted for its floating structure.

How does solarDuck work?

Space constrained by nature, often running on diesel powered generators. The responsible use of surrounding waterbodies by applying SolarDuck technology, allow islands to become energy dependent and reduce carbon emissions. Relying on diesel or gas-powered generators to supply in energy demand.

Can a floating solar system be used in inland waterbodies?

Additionally, larger inland waterbodies can be ideal for SolarDuck's floating solar solution. Experience fast rising energy demand and increasing space constraints. As many megacities are located in coastal areas, energy production can take place close to point of use. Space constrained by nature, often running on diesel powered generators.

What is 'king eider' & how does 'solarDuck' work?

Launched in April 2021 in IJzendoorn in the Netherlands, SolarDuck's first pilot dubbed 'King Eider' consists of four triangular-shaped units, which are mounted by 156 solar panels and deliver a combined electrical output of 64kWp to the grid. The structure holds the solar panels more than three meters above water level.

Israel Faroe Islands live score (and video online live stream) starts on 15 Nov 2021 at 19:45 UTC time in World Championship Qual. UEFA F, Europe.

SolarDuck is a Dutch-Norwegian company that is pioneering the technology to bring solar PV to the seas, and we are looking for talented individuals to join our team. As a spin-off of Damen Shipyards, a leading Dutch shipbuilder, SolarDuck was founded in 2019 by a team of experienced entrepreneurs from the maritime industry. We are headquartered ...

Company: SolarDuck Location: Rotterdam, Netherlands. About Us: SolarDuck is a pioneering Dutch-Norwegian company revolutionizing Offshore Floating Solar Photovoltaics (OFPV). Established in 2019 by experienced maritime industry entrepreneurs, we are headquartered in Rotterdam, with growing
