

Solaris energy infrastructure Ivory Coast

Will Ivory Coast get a 52 MW solar plant?

The Ivory Coast government has signed an agreement with infrastructure investor PFO Africa for the financing, construction and operation of a 52 MW solar plant. The project has been billed as the country's largest to date.

When will Ivory Coast's solar power plants be built?

The minister said that contracts are currently under review for the construction of other solar power plants, with a cumulative capacity of 600 MW. Commissioning of these projects will take place in 2025 and 2026. Coulibaly said the Ivory Coast's installed solar capacity currently stands at 2,907 MW.

How much energy does the Ivory Coast have?

It currently has a capacity of 37.5 MW, but Coulibaly says this is set to expand to 80 MW, with financing for the expansion already approved by the Council of Ministers. The Ivory Coast has vowed to reduce its greenhouse gas emissions by 32% and increase the share of renewable energy in its energy mix to more than 40% by 2030.

How will a new power station help Ivory Coast?

In addition to supplying the country with 37.5 megawatts of clean energy, the power station will enable Ivory Coast avoid the emission of 27,000 tonnes of carbon dioxide annually. Up to 300 construction jobs were created during the construction phase.

What is the largest solar project in Africa?

The project has been billed as the country's largest to date. The government of the Ivory Coast has signed a concession agreement with infrastructure investor PFO Africa for a 52 MW solar PV plant in the village of Sokhoro, in the northern part of the West African country.

How many jobs will Ivorian energy project create in 2024?

Construction will begin in the second quarter of 2024, with commissioning scheduled for the third quarter of 2025. According to Ivorian Energy Minister Mamadou Sangafowa Coulibaly, the project will create 150 jobs during construction and 15 permanent jobs during operation.
