BIPV materials, such as solar roof tiles and solar wall panels, replace conventional construction materials while generating electricity. This integration allows architects to maintain design continuity without compromising the building's energy-producing capabilities.

Solex Solar Tiles offer an alternative to conventional solar panels for new roof applications. They use the same technology as modern solar panels - monocrystalline half cells - and produce electricity in the same way. The difference is that they form the actual roof covering, replacing conventional tiles. The tiles connect together using ...
