Somalia: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Sources: Ministry of Energy and Water Resources (MoEWR); The World Bank Sector Spotlight: Energy The supply and demand gap of the energy sector in Somalia is huge and requires foreign investment to reduce the gap and create accessible and affordable energy to fuel Somalia's economic growth. Untapped domestic market: 60.4% of electricity
