

# South Sudan invests 6.7 billion in energy storage

Should South Sudan invest in capacity building programs?

and utilization. The conclusion is that South Sudan needs to invest in capacity building programs and implement governance reforms to enhance transparency, accountability, and the effective implementation

Is South Sudan a good place to invest in solar?

There is minimal regulatory support for of-grid solar from the South Sudanese government, compared to Kenya, Uganda, and Rwanda, where the market is growing steadily (Hankins, 2019). Private companies are therefore discouraged from entering the market due to the challenging business environment (Altai Consulting, 2014).

How many energy companies are there in South Sudan?

There are about fourteen of-grid energy companies in South Sudan, and their services include i) selling solar products, ii) engineering, procurement, and construction (EPC), iii) independent power production (IPPs) and iv) developing mini-grids.

How much solar energy does South Sudan have?

South Sudan receives about 8 hours of sunshine daily, providing an estimated solar energy capacity of 436 W/M<sup>2</sup>/year (REEP, 2013). Similarly, wind energy density ranges between 285 and 380 W/M<sup>2</sup> (REEP, 2013). Both the solar sunshine duration and wind density meet the threshold required to produce high quality electricity.

Is South Sudan a good place to buy energy?

Based on independent sources from consumers and suppliers, most of-grid energy products available in South Sudan are neither standardised nor quality verified. This hinders uptake, as many households reported quality to be a main factor in their purchase decision, especially in urban areas.

Does South Sudan have a high demand for solar products?

This study reveals potentially high demand for of-grid solar products in South Sudan due to the low national electrification rate of 5.4%. However, the lack of affordability and availability of of-grid products hinder consumers from acquiring these products.

This paper proposes an optimized energy management strategy (EMS) for photovoltaic (PV) power plants with energy storage (ES) based on the estimation of the daily ...

Sudan's huge loss in crude oil export revenues post South Sudan's independence in 2011 (revenue fell from almost \$11 billion in 2010 to just under \$1.8 billion in 2012) (U.S. Energy ...
