

So, the short explanation is "yes", with the long being "yes, absolutely". It was a very shortsighted decision in the most charitable terms. But the idea behind it was, at the time, that Spain was in the midst of the ongoing financial crises of the post 2008 crash, so it makes some sense to try and find revenue any which way, ideally while protecting services (which, surprise!

Spain's first large-scale solar PV panel factory is expected to be commissioned this spring, Spanish utility Iberdrola SA said on Monday. Iberdrola is a co-investor in the plant alongside Spanish Tier 1 solar panel manufacturer Exiom.. The factory is located in the Asturias region, in the old mining and metallurgical town of Langreo, where Iberdrola used to run a now ...

Solar panels in Spain have burst into the population with great success, taking advantage of the sun's rays to produce energy in our homes. Without going any further, in 2021, self-consumption marked a record year ...

Spain's solar potential. Spain is one of the first countries to deploy large-scale solar photovoltaics, and is the world leader in concentrated solar power (CSP) production.. In 2022, the cumulative total solar power installed was 19.5 GW, of which 17.2 GW were solar PV installations and 2.3 GW were concentrated solar power. [1] [2] In 2016, nearly 8 TWh of electrical power was ...

Hamburg-based investor Aquila Capital Holding GmbH has signed an agreement to acquire a developing solar PV portfolio with 500 MW of projects in Spain from Viridi RE and Solar Ambition, subsidiary of Green Enesys Group.

The SPI Network comprises more than 9,000 solar angel, family office, venture, special situations, private equity, and infrastructure investors in addition to 4,000 company executives, service professionals, and regulatory staff.

THE PERINET WINERY & SOLAR IN SPAIN CREATING PERFECT HARMONY AMONG THE VINES
