

Spain tecil solar

Who is tecil solar?

Tecil Solar is the Power Solutions division of our company and is focused on the provision of quality product and services in the area of Alternative and Renewable energy Power solutions and related services.

How much solar power does Spain have?

In 2008 the Spanish government committed to achieving a target of 12% of primary energy from renewable energy by 2010 and by 2020 expected the installed solar generating capacity of 10 GW. Since 2010, Spain has been the world's leader in concentrated solar power (CSP).

Is Spain a good country to invest in solar power?

Spain is one of the first countries to deploy large-scale solar photovoltaics, and is the world leader in concentrated solar power (CSP) production.

Is Spain a leader in concentrated solar power?

Since 2010, Spain has been the world's leader in concentrated solar power (CSP). Spain is leapfrogged by Italy during 2011 following a later solar boom there to lose its position as the world's second largest installer of solar PV.

What is the technical potential for residential solar PV in Spain?

The technical potential for residential solar PV in Spain is estimated at 13,620 MW. The United Kingdom, a relative latecomer to Solar PV development, had 2,499 MW of residential solar PV installed as of 2015.

Why is Spain the first country to integrate solar thermal systems?

Concerning thermosolar energy, Spain was the first country in Europe to enforce the integration of solar thermal systems in new constructed or refurbished buildings to cover from 30 to 70% of the Domestic Hot Water (DHW) demand.
