Saint Kitts and Nevis: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

"This project is one for the history books, it will enable St. Kitts and Nevis to significantly reduce its reliance on fossil fuels, thereby lowering its carbon footprint, preserve its natural resources, and contribute to global efforts to combat climate change thus ensuring a healthier environment for future generations," said Dr Drew about the project.

Over the past several years, St. Kitts and Nevis has implemented several energy efficiency and renewable energy projects. In 2014, a light bulb exchange program was launched to replace existing residential lighting with 323,000 LED bulbs at a cost of roughly \$2.5 million; the manufacturing sector underwent a comprehensive energy audit; and ...
