

What is fenecon energy storage?

The FENECON electricity storage systems use the OpenEMS-based smart energy management system FEMS to enable grid-serving charging and discharging up to intelligent sector coupling of electricity, mobility and heat. At FENECON, we pursue the clear vision of the 100% energy transition.

Where is fenecon batteries made?

Battery system manufacturer Fenecon has laid the foundation stone for a new production site in Iggenbach, Bavaria. The newly named Carbattery Refactory will cost around 22 million euros in the first stage of expansion. Fenecon has already been producing large container storage units from electric vehicle batteries since 2017.

Can a fenecon battery be used in a solar system?

Fenecon states the battery is suitable for all new photovoltaic systems and the retrofitting of existing systems. A combination of DC and AC-coupled connections is also possible. In the event of a power failure, the integrated power disconnection allows uninterrupted and powerful emergency power operation, with solar recharging.

What is a Fenecon modular battery?

The Fenecon modular battery is a product manufactured by Germany's Fenecon. It has a storage capacity ranging from 8 kWh to 22 kWh. The battery is claimed to allow predictive, grid-friendly charging and discharging.

How much does fenecon battery Refactory cost?

The newly named Carbattery Refactory will cost around 22 million euros in the first stage of expansion. Fenecon has already been producing large container storage units from electric vehicle batteries since 2017. Small series production is currently still taking place at the plant in Künzig.

What is fenecon's container storage unit?

The highlight: Fenecon's container storage units consist of spare part batteries and those that have already been used in vehicles. With the large-scale storage units, industrial companies, energy suppliers or charging park operators can temporarily store electricity in the future and thus increase grid stability.

Die FENECON Stromspeicher werden das auf OpenEMS basierenden smarten Energiemanagementsystem FEMS, um netzdienliches Be- und Entladen bis hin zu ...
