With multiple solar arrays, batteries, a natural gas turbine, a hydrogen electrolyzer and fuel cells, Stone Edge Farms (SEF) has deployed a fully autonomous, resilient and sustainable microgrid system.

Join us at Microgrid 2019 in San Diego. The 16-acre Stone Edge farm describes itself as a "demonstration farm for what is possible," at the cutting edge of soil, water, air and energy conservation. Cover crops and extensive composting ensure soil and plant health, and monitoring technologies have cut water use in half.

by Ann Hancock, Executive Director, The Climate Center On August 3, 2018, Stone Edge Farm unplugged from the grid, a celebratory moment for the team that made it possible. For supporters like us, the moment offers a glimpse into the future of energy. To unplug, Stone Edge Farm got no permission or help from PG&E. Everything on the bustling 16-acre...
