

Sunbeam bv Slovenia

What is Sunbeam Luna?

Sunbeam Luna is our mounting system for pitched roofs. The smart, stable construction allows for a rapid mounting process and optimally and safely supports the solar panels. This way, the solar panels can generate sustainable energy for years, without any issues.

Does Sunbeam have a ballasted roof system?

Until now, the Supra system has been installed ballasted. However, with the addition of fully anchored systems, Sunbeam now offers an innovative solution for roofs that can support less weight. This is a crucial development, as ballasted systems are sometimes not a viable option for certain roof structures.

Does Sunbeam offer a lighter mounting system?

This upgrade meets growing market demand for lighter mounting systems due to the limitations of roof structures. Until now, the Supra system has been installed ballasted. However, with the addition of fully anchored systems, Sunbeam now offers an innovative solution for roofs that can support less weight.

How many solar panels are placed diagonally on Sunbeam Luna substructures?

In addition, almost 14,000 panels are placed diagonally on Sunbeam Luna substructures. The solar roof of Scania Production in Zwolle, featuring roughly 22,000 solar panels, has a capacity of 6 MWp. This project was realised by Zonneplan using a Sunbeam Symmetrical substructure.

Sunbeam BV at its turn, has made a document which gives an account of their calculation tool, the Sunbeam Calculator: "Justification for Sunbeam ballast values" dated January 10th, 2017 and submitted it to us for assessment. We can confirm this document contains a proper interpretation of our wind tunnel measurements and the underlying basic

Sunbeam BV | 2,331 followers on LinkedIn. Supporting Sustainability | SUNBEAM (2011) is a supplier of mounting systems for solar panels on flat and pitched roofs. In our opinion, installing solar panels can be better, simpler and faster. SUNBEAM has a sustainable and social vision.
