

Sustainable power solutions Tokelau

Can Tokelau support itself with solar energy?

Tokelau, an island nation in the South Pacific, is now completely able to support itself with solar energy. Elly Earls met Joseph Mayhew of the New Zealand Aid Programme to find out how this tiny collection of atolls has become almost 100% self-sufficient in less than 12 months.

Could Tokelau be the world's first renewable nation?

Solar power plants and coconut biofuel-powered generators switched on in Tokelau has made the islands the world's first truly renewable nation.' Imagine a place where the only energy to be found is clean, reliable solar power. Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy.

What is Tokelau's energy policy?

The primary focus of the policy is the desire of Tokelau to become self-reliant in energy through a combination of renewable energy and energy efficiency measures.

Where does Tokelau get its electricity from?

Except for that part of the electricity supply provided by Solar Photovoltaic (PV) to TeleTok facilities on all three atolls and the University of the South Pacific (USP) facility on Atafu, essentially all energy in Tokelau currently is from imported petroleum.

How much electricity does a solar system provide in Tokelau?

Each system alone is among the largest off-grid solar power systems in the world, and together they are capable of providing 150% of current electricity demand in Tokelau, a much higher amount than the 90% that was originally planned for.

What is the Tokelau PV project?

The Government of Tokelau sees the PV Project as the first step and therefore trial towards the long-term goal of energy independence based on renewable energy. The project is implemented by the Government of Tokelau and funded jointly by Government of New Zealand, Government of France, UNESCO Apia and UNDP Samoa.

SustainPower provides innovative and sustainable energy solutions that empower businesses and communities. Our experts design and manufacture high-quality, durable power generation and energy storage systems. With a focus on environmental responsibility and cutting-edge technology, we aim to transform how developing economies access and use energy.

SustainPower provides innovative and sustainable energy solutions that empower businesses and communities. Our experts design and manufacture high-quality, durable power generation and energy storage

The Power Systems Business Unit of Rolls-Royce is focused on creating sustainable, climate neutral solutions for drive, propulsion and power generation. We are making a significant contribution to the energy transition with environmentally-friendly technologies from our mtu product and solution brand. As leaders in standby power for safety-critical plants and ...

Sustainable power solutions Tokelau

Lack of reliable grid power has led to more than half of businesses in sub-Saharan Africa using diesel generation to ensure certainty of supply. Solar power and battery storage solutions are increasingly providing a viable, cheaper alternative for many businesses that see the value in using greener, more consistent power.

Director at Sustainable Power Solutions | Electrical Engineer | Renewable Energy Specialist. We help companies transition to a more sustainable energy supply · I am Satwant Wraich, and I founded SolarPulse with a core principle of sustainability, driven by a vision to create a greener and brighter future for New Zealand. My journey began with a diverse group of experienced ...
