

Svalbard and Jan Mayen energy storage equipment

Where are Svalbard and Jan Mayen located?

The islands are located north and northwest of Norway, within the southern limits of Arctic sea ice -- the northernmost point of Svalbard is within a 620 mi (1,000 km) of the North Pole. Svalbard is approximately 24,570 square mi (63,000 square km); Jan Mayen is approximately 145 square mi (373 square km).

How can Svalbard maintain a secure and sustainable supply?

Furthermore, the case found that the best long-term solution for Svalbard to maintain a secure and sustainable supply would be to integrate a mix of renewable energy technologies. Some of these technologies include: solar panels (PV), wind turbines, heat pumps connected to geothermal and both heat and electricity storage.

Are Longyearbyen and Svalbard facing an energy transition?

Top image: Longyearbyen and Svalbard are facing an energy transition. This is the background for the cooperation agreement between UNIS, Store Norske and SINTEF. Photo: Graham Gilbert/UNIS. Longyearbyen and Svalbard are facing a huge energy transition.

Jan Mayen has no permanent residents and visits to the island are rare. In fact, we're one of the few to attempt landings here. If conditions allow, you'll be setting foot in one of Earth's most remote places. Jan Mayen's surreal, moss- and lichen-streaked landscape is dominated by the Beerenberg volcanic cone.

As the ocean currents meet around the island, air masses and air currents also converge, producing strong winds and a high wave energy along the coast of the island. From Iceland the North-Atlantic Midoceanic Ridge stretches NE as the ...

Svalbard i Jan Mayen (norw. Svalbard og Jan Mayen, ISO 3166-1 alfa-2: SJ, ISO 3166-1 alfa-3: SJM, ISO 3166-1 numeryczny: 744) jest nazwa statystycznej jednostki zdefiniowana w ISO 3166-1. Składa się z dwóch norweskich terytoriów z niezależną jurysdykcją: Svalbard i Jan Mayen. Terytoria te są połączone dla celów w klasyfikacji Międzynarodowej Organizacji ...

Recently-formed energy storage developer Ingrid Capacity is building a 70MW battery storage facility in Sweden for a delivery date as early as H1 2024, the largest planned in the Nordic country. The company is planning the one-hour system for an interconnection point managed by utility E.ON, the German-headquartered company, in Karlshamn, on ...

The area potentially concerned stretches from Svalbard to Jan Mayen Island, covering 280 000 square kilometers of Arctic seabed. Despite protests and warnings from environmental organizations, scientists and many ...
