

Who is Svevind Energy Group?

SVEVIND Energy Group announces today that it has completed a transaction with the leading Norwegian utility Statkraft. Our Swedish subsidiary SVEVIND Nordic AB, the successor to SVEVIND AB, is now officially part of Statkraft. The... The first week of October 2022 marked an important milestone in the history of Svevind's "Project Sandbacka".

Who does Svevind work with?

Svevind works with consultants, who are specialists in wind calculations, planning, project design, consultations and environmental impact descriptions. Once the project descriptions and environmental impact assessments are complete, the permit application or building notification is submitted.

How does Svevind AB manage a wind farm?

Svevind AB establishes a subsidiary for the project, which is then responsible for project planning. Construction and ownership may also be through Svevind AB's subsidiaries. Once the wind farm has been approved, Svevind AB or the relevant subsidiary may sell all or part of the project, or retain it for its own construction and operation.

Why did Svevind energy get a partnership with Semurg invest?

One core element for this is the signed cooperation agreement with Semurg Invest, the owner and operator of the largest terminal facility of the port of Kuryk on the Caspian Sea. Another milestone was reached just before year ended as SVEVIND Energy received confirmation that Germany is backing our project with an so called investment guarantee.

Will 2023 be a groundbreaking year for Svevind Energy Group?

There are years in the history of a company that, in retrospect, are described as groundbreaking, as shaping the future. 2023 was exactly that for SVEVIND Energy Group - a year that will go down in the annals of company history. But first things first.

Why did Svevind energy buy Markbygden net?

In order to drive this process forward as effectively as possible, SVEVIND Energy divested the grid company „Markbygden Net" operating Sweden's most powerful substation, the 1700 megawatt substation Råbacken and related grid infrastructure to the Nordic grid operator Ellevio.

Sweden's fastest growing energy source. Wind power is a renewable energy source for which nature creates the conditions. Svevind produces renewable energy powered by nature. Svevind is a privately owned company in the wind power industry, based in Piteå; in northern Sweden, where it also has its main area of operation. Read more. Svevind achievements so far. ...

The contract was awarded by Hyrasia one -- a subsidiary of the European cleantech group SVEVIND Energy Group --which is developing a major wind-solar-hydrogen plant in Kazakhstan. The plant will produce up to two million tonnes of green hydrogen or 11 million tonnes of green ammonia per year from 2030.

6. Balances the energy system: Excess electricity from wind and solar can be used to produce hydrogen for later use, at times of low wind and solar generation. This helps to balance the energy system and enhances Sweden's energy security and resilience. 7. Creates sustainable jobs in Sweden for the generations to come. 8.
