

Tajikistan juniper renewables

What are alternative energy sources in Tajikistan?

In Tajikistan, alternative energy sources account for approximately 2% of the total energy balance and are mainly micro and mini-hydro power plants, 95% are large hydropower plants, and 3% are thermal power plants that use coal. About 300 small HPPs have been built in the country.

Will MW energy develop 500MW solar projects in Tajikistan?

Masdar subsidiary MW Energy plans to develop 500MW of renewable projects in Tajikistan, which will include solar projects.

How much solar energy can be used in Tajikistan?

Preliminary calculations of the Ministry of Energy of Tajikistan have shown that the potential for the use of solar energy is 3,103 billion kWh per year. This amount would be enough to cover the winter power shortage partially in Tajikistan in regions of the country where 70% of the population lives.

Is solar energy a viable alternative to electricity in Tajikistan?

According to the Agency of Hydrometeorology of Tajikistan, the duration of sunshine in the country is 2100-3166 hours per year, and the number of sunny days per year ranges from 260 to 300. This provides great opportunities for the use of solar energy as an alternative, especially in mountainous regions where there are no power lines.

What is Masdar MW energy doing in Tajikistan?

Image: Masdar MW Energy has signed a memorandum of understanding with Tajikistan's Ministry of Energy and Water Resources to develop 500MW of renewable power projects in the country, which will include ground-mounted and floating solar projects.

What is the capacity of a solar power plant in Tajikistan?

The solar power station has a capacity of 220 kW. For comparison, the capacity of the smallest hydropower plant in Tajikistan - Varzob Hydropower Plant-3 is 3.52 MW, and the largest operating hydroelectric power plant - Nurek - 3000 MW and it generates 70% of electricity consumed in Tajikistan.
