

What is a Teknoware central battery system?

Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing thousands of luminaires.

Do Teknoware luminaires need separate data cabling?

The testing of the luminaires is based on individual addresses, and the communication is by means of the power supply cables. Thus, there is no need for any separate data cabling between the luminaires. The luminaires must be addressable, of the Teknoware products with the letter K in the end, or they must have a separate address module.

Where are the central battery systems made?

All our central battery systems and their components, as well as all the accessories and spare parts related to these systems, are designed and manufactured in our own factory in Finland. The central battery systems are always made to order, according to the needs of the customer.

TKT65B series central battery system offers an effective solution to supply medium to high number of emergency and exit lights. It is suitable for medium sized buildings. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings, and ships. +358 3 883 020

Central battery system in TKT65xxCX series, as all our Tapsa Control central battery systems, takes care of the testing automatically. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings, and ships. +358 3 883 020

The central battery system in the TKT7 series offers an efficient, high-tech emergency lighting solution. You can easily modify the system according to your needs, making the new TKT7 series a truly flexible choice. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings ...

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. ...

The 7 series is compatible with all our 230 V addressable luminaires, which makes it easy to upgrade an old central battery system. The central battery unit is easily upgraded according to the number of luminaires in the property. Depending on the model, the 75C central battery unit has 4-24 output circuits. Max. battery capacity 65 Ah.

Central Battery Systems Self Contained Systems Escap self-contained luminaires MyTeknoware For Ships and Vessels. Services. After-Sales Service Design support. ... Teknoware Oy . Our passion is finding the best lighting, interior or emergency lighting solution for trains, buses, buildings, and ships. +358 3 883 020

Explore Teknoware Middle East's Central Battery Systems 6 Series, offering advanced power solutions for emergency lighting. Learn about the cutting-edge features, centralized control, monitoring capabilities, and enhanced efficiency designed for safety and compliance in various applications across t

The central battery system is compatible with all of our 230 V addressable luminaires so you can replace an existing system with ease. The TKT7 series is an easy to adapt solution for locations which need different numbers of luminaires. The central battery system in the TKT78C series is particularly suitable for medium-sized buildings.

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the ...
