Will liquified natural gas meet Thailand's energy needs?

Last year, our three main predictions were: (i) an increased reliance on liquified natural gas ("LNG") to meet Thailand's energy needs; (ii) the additional deployment of renewable energy projects; and (iii) the development of an electric vehicle ("EV") ecosystem.

Will Thailand increase reliance on renewables?

Thailand plans to increase reliance on renewables, particularly solar, wind and biomass, as alternatives to gas. This will see an expected 5.5 GW of renewable energy capacity growth by 2030.

What is Thailand's energy strategy?

Thailand's energy strategy aims to bolster energy security, keep electricity costs economically viable, reduce environmental impacts, and enhance efficiency across its power systems. One of the plan's core strategies is to expand renewable energy capacity, targeting a diverse mix including solar, wind, biomass, biogas, and waste-to-energy sources.

What is Thailand's 2024 energy plan?

Thailand's 2024 Energy Plan: Renewables, Nuclear, and Sustainability- Your guide to Thailand! In a significant move towards sustainable energy development, Thailand's Electricity Generating Authority (Egat) has launched a new floating solar farm with a capacity of 45MW at Sirindhorn Dam in Ubon Ratchathani province.

What will Thailand's energy plan look like in 2037?

Under this plan, renewable energy is slated to comprise 51% of Thailand's total energy mix by 2037, up from 20% in previous years. Conversely, the share of gas is anticipated to decrease to 41%, down from 57% in 2023, while coal usage is projected to diminish to 7%.

Can hydrogen be used as a power source in Thailand?

The integration of hydrogen into natural gas for power production is also proposed, aiming to blend 5% hydrogen with natural gas by 2030 to reduce carbon emissions and facilitate a smoother energy transition. Thailand's PDP 2024 has set ambitious carbon reduction targets.

Thailand's PDP 2024 represents a decisive step toward a sustainable energy future. With a focus on expanding renewable energy, reducing carbon emissions, and integrating advanced technologies, Thailand is poised ...

Mdm Energy, Inc. is currently ranked #2,873 in the state of Texas based on a total production of 8,960 barrel of oil equivalent (BOE) reported during the month of 09-01-2024. The company has an estimated daily production of 1 BBLs oil and 1 MCF of gas, coming from 1 actively producing wells in the state.
