

# The industry calls for the healthy development of new energy storage

At a glance: The Ministry of Industry and Information Technology (MIIT), the Ministry of Finance (MOF) and the National Data Bureau released a plan to develop a big data ...

Accelerating the planning and construction of a new energy system is an important condition and foundation for promoting Chinese path to modernization. The ...

Buoyed by the rapid growth in the renewable energy industry and strong policy support, China's development of power storage is on the cusp of a growth spurt which will ...

The Action Plan emphasizes addressing multi-dimensional safety technologies throughout the entire lifecycle and encourages new energy storage to participate in the ...

Currently, as the new energy storage industry shifts from scale expansion to prioritizing quality and efficiency, and from policy-driven to market-led approaches, it faces both ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, ...

This is the first new energy storage supply-side policy document led by the Ministry of Industry and Information Technology. The content covers many aspects such as ...

The new energy storage has been applied in power systems with strong production capacity. China's first megawatt iron-chromium flow battery energy-storage ...

Abstract Renewable energy integration and decarbonization of world energy systems are made possible by the use of energy storage technologies. As a result, it provides ...

During energy storage, external electrical energy propels flywheel rotors to spin faster, thereby storing energy kinetically. Recognizing the strategic importance of new energy ...

China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

# The industry calls for the healthy development of new energy storage

In June 2023, China achieved a significant milestone in its transition to clean energy. For the first time, its total installed non-fossil fuel energy power generation capacity ...

On February 10, 2025, eight departments, including the Ministry of Industry and Information Technology (MIIT), issued the Action Program for High-Quality Development of the New ...

In 2024, new energy storage was written into the "Government Work Report" for the first time, which the industry regarded as a major positive news. Over the past year, the ...

The 14th Five-year Plan is an important new window for the development of the energy storage industry, in which energy storage will become a key supporting technology for ...
