

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

How much does electricity cost in Timor-Leste?

The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries. For instance, in Indonesia industrial electricity tariffs are 0.11 USD/kWh, compared to 0.24 USD/kWh in Timor-Leste.

Do Timor-Leste businesses experience electricity outages?

Research shows that nearly all businesses in Timor-Leste experience electricity outages, in some cases multiple times a week. Outages affect businesses in different ways: For tourism businesses, it impacts customer experience (internet, device charging, air conditioning and fans, food quality, and inability to refuel diving tanks).

Do Rural Households use electricity in Timor-Leste?

Stakeholder responses and anecdotal observations of rural households in Timor-Leste revealed that lighting, mobile phone charging, television, and radio dominate electricity use with limited adoption in agriculture-related activities. According to respondents, some farming groups operated small diesel generators for rice milling.

Does geopolitics influence Timor-Leste's energy reconstruction?

Totalling 280 MW, the national generation capacity is much greater than the current national peak load of 70 MW. It was commented that the two largest power stations were second-hand generators installed through a partnership with China, highlighting the influence of geopolitics in Timor-Leste's energy reconstruction. Fig. 4.

In 2022, Timor-Leste's electricity consumption was predominantly reliant on fossil fuels, contributing to more than half of its electricity generation. The availability of low-carbon electricity sources like wind, solar, and nuclear was close to none. The overall electricity consumption in Timor-Leste was significantly lower than the global average of 3,606 watts per person, ...

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.¹ Consumer costs, even with government subsidy, remain high and outages

are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

operators involved in the energy sector in Timor-Leste. The purpose of this report is to assist the government of Timor-Leste, in particular the office of the Secretary of State for Energy Policy, to develop policies in key areas that would guide planning of the subsequent phase of its ongoing rural energy programs. The selected key areas in

The study was concluded on the 29 May and analysed several sources available in our national territory, such as wind, hydro, biomass and solar energy. The result was promising, as explained by the Secretary of State for Energy Policy, Avelino Coelho: "the study shows that Timor-Leste possess a strong potential in the renewable energies area.
