

# Tokyo energy storage facility

Does Japan need energy storage?

Japan, like Britain, is an island country with relatively little interconnection to neighbouring states. That means it needs to balance and manage volatility within its own grid networks, and energy storage is a key technology to enable that, especially as rising shares of renewable energy will increase that volatility.

Is Tokyo Gas an offtaker?

Tokyo Gas is the only known company in Japan to have signed tolling agreements as an offtaker. Tokyo Gas signed 20-year tolling agreements for two grid-scale BESS projects with a combined power capacity of 80MW, bringing its total to 110MW across three sites, the company announced on June 30, 2025.

Is Tokyo Gas a tolling offtaker?

To date, Tokyo Gas is the only known company in Japan to have signed tolling agreements as an offtaker. The scheme's role in large-scale BESS project bankability in Japan is likely to grow with the recent exclusion of sub-six-hour storage assets from the government's long-term decarbonization auction.

How much power does Tokyo Gas have in 2025?

Tokyo Gas signed 20-year tolling agreements for two grid-scale BESS projects with a combined power capacity of 80MW, bringing its total to 110MW across three sites, the company announced on June 30, 2025. Both assets are expected to be commissioned in FY2027.

Does Japan have a battery subsidy program?

As Japan works to expand battery storage amid growing solar and wind capacity, METI also runs a similar subsidy scheme at the national level. In FY2024, it awarded 34.6 billion yen to 27 projects. Both programs are expected to continue in FY2025.

Welcome to the website of the Tokyo Electric Power Company (TEPCO), Japan. View our corporate information and learn more about our latest technologies in power generation as well ...

About ISO certification We obtained quality management systems certification under the International Organization for Standardization (ISO) 9001 standard in ...

The purpose of the Mutsu Interim Storage Facility is to safely store and manage nuclear spent fuel from nuclear power plants of the Tokyo Electric Power Co. (TEPCO) and the ...

As Japan accelerates its renewable energy adoption, high power energy storage machine brands are scrambling to power this transformation. In 2025 alone, the market is projected to grow by ...

Energy Storage specialist, Eku Energy recently announced a 30MW/120MWh Hirohara battery energy storage
