

Trinidad and Tobago fourth power energy storage

Page 6 of Tel.: 1 South Office: Petroleum Asset Monitoring and Measurement Division, Maska Building, South Trunk Road, La Romaine, Trinidad W.I., Maska Building ...

Renewable energy potential: Although the focus has primarily been on fossil fuels, Trinidad and Tobago is exploring renewable energy options such as solar and wind power. The government recognizes the need to diversify its energy sources and reduce reliance on hydrocarbons, paving the way for a more sustainable future.

CCS TLM Limited - Feasibility Study for Trinidad & Tobago RT.18001.004 Rev1.0 CONFIDENTIAL Page 2 ©CCS TLM Limited 2012 1. Executive Summary While the worldwide demand for energy grows, so does the demand that it should be

Energy Storage -- Battery Assembly. Energy storage is a rapidly growing segment of the clean energy sector, and prices have dropped dramatically over the years. According to Wood Mackenzie's 2020 Global Storage Outlook, deployments will grow 13-fold from a 12-gigawatt-hour market in 2018 to a 158-gigawatt-hour market in 2024.

Trinidad and Tobago is a small island developing state (SIDS) with one of the largest emitters of CO₂ per capita globally - linked to a reliance on oil and gas. With the country's commitment to sustainable development goals and climate change agreements, rapid redesign of the national power sector is critical to promoting a sustainable energy transition.

Fourth Power makes renewable energy an on-demand energy source through utility-scale, thermal battery technology. With the ability to provide flexible-duration energy storage, we can start small and grow with the grid to save consumers money and ensure a clean energy future.
