

Turks and Caicos Islands solar pumps for irrigation in

From manual irrigation to solar. Manual irrigation is labour intensive and, as a result, the size of land you can cultivate is limited. Switching to solar can give you hours back in your day as the pump will move water for you - either directly to the crops or to a tank for gravity irrigation later. From electric pumps to solar pumps

Setting up the SF1 solar pumps across the five hectare site Scaling up. The IFC and EUCORD have plans to scale small-scale irrigation technology across Rwanda - and indeed the continent - and this project will help prove what a difference solar irrigation technology can make. Futurepump (Rwanda) Ltd is now operating from Kigali. Our mission ...

De plus, l'énergie solaire est gratuite et en abondance pendant la saison sèche, lorsque les cultures nécessitent le plus d'eau. Les agriculteurs qui exploitent efficacement cette énergie gratuite en pompant de l'eau pour les champs et dans des réservoirs surélevés pendant la journée, alors que le soleil est le plus brillant, peuvent récolter d'énormes avantages.

We are experts in the manufacturing of solar water pumps, with over 10,000 solar pumps sold in more than 20 countries - and counting!
