Is Russia targeting Ukraine's energy system?

Ukraine's energy system has been regularly targeted by Russia since its full-scale invasion in 2022, with attacks intensifying since the spring of 2024. The targeting of energy infrastructure has had wide-ranging consequences for the provision of energy to Ukrainian households and other consumers.

Can Ukraine recover power from a decentralized energy system?

Whatever the future, the decentralized nature of some clean energies, in particular wind and solar, has allowed Ukraine to quickly restore power in ways that would be impossible with Ukraine's more traditional energy sources, such as coal-fired power plants.

How dangerous is Ukraine's energy infrastructure in 2024?

With the escalation of attacks against Ukraine's energy infrastructure in 2024, the risks are significantly higher this winter. Temperatures can routinely drop below -10 °C between December and March, posing a serious humanitarian risk if heating is not available.

Does decentralisation drive energy security in Ukraine?

Despite the high investment risks, the construction of a more decentralised system has begun, increasing resilience to attack and laying the groundwork for a distinctive longer-term transition pathway. In contrast with other countries, where decentralisation has been driven by sustainability concerns, the clear driver in Ukraine is energy security.

How important is Ukraine's energy sector?

Ukraine's air defences provided some protection, but the scale of the attack and the resulting disruption highlighted once again the vital strategic importance of Ukraine's energy sector, as well as the ever-present risks to the country's energy supply.

What is happening in Ukraine's energy system?

Despite this, nuclear, hydropower, and newly constructed renewable projects continue to provide critical electricity. International partnerships have been pivotal in rebuilding Ukraine's energy systems. Companies such as GE Vernova and Honeywell are collaborating with DTEK on wind and battery storage projects.

Zerowatt Homes (International) Limited is an active company incorporated on 31 January 2019 with the registered office located in . Zerowatt Homes (International) Limited has been running for 5 years. There are currently 2 active directors and 1 active secretary according to the latest confirmation statement submitted on 31st January 2019.
