The United States Energy Association (USEA) is a nonprofit, apolitical, nonlobbying organization founded in 1924. USEA's mission has two pillars of equal importance. USEA serves as a resource, by convening energy stakeholders to share policy, scientific, and technological information to foster the advancement of the entire energy sector.

The United States has been an annual net total energy exporter since 2019. Up to the early 1950s, the United States produced most of the energy it consumed. 1 U.S. energy consumption was higher than U.S. energy production in every year from 1958-2018. The difference between consumption and production was met by imports, particularly crude oil and petroleum products ...

2 · The Energy Act of 2020 calls for the U.S. Department of Energy to make available to the public an update to Lawrence Berkeley National Laboratory's prior study entitled United States Data Center Energy Usage Report (2016).

The Annual Energy Outlook 2023 (AEO2023) explores long-term energy trends in the United States. Since we released the last AEO in early 2022, passage of the Inflation Reduction Act (IRA), Public Law 117-169, altered the policy landscape we use to develop our projections. The Appendix in this report explains our assumptions around IRA ...

The United States secretary of energy is the head of the United States Department of Energy, a member of the Cabinet of the United States, and fifteenth in the presidential line of succession. The position was created on October 1, 1977, when President Jimmy Carter signed the Department of Energy Organization Act, establishing the department. [2] The energy ...

Secretary of Energy of the United States Jennifer Granholm and the Federative Republic of Brazil's Minister of Mines and Energy, Alexandre Silveira announced new, joint initiatives on clean energy and renewed their commitment to advance a just and inclusive energy transition today at the third ministerial meeting of the U.S.-Brazil Energy Forum (USBEF).

"Fifteen U.S. states have now committed to transition to using 100 percent clean energy sources. More than half of the nation's population lives in a 100 percent clean state or local jurisdiction."

Energy consumption fell faster than gross domestic product in 2020, and the pace at which both will return to 2019 levels remains uncertain. Petroleum remains the most-consumed fuel in the United States, as energy-related carbon dioxide emissions dip through 2035 before climbing in ...
