

United States franklin battery

Does a franklinwh battery deteriorate?

The battery life of your FranklinWH will deteriorate in the same way, and that isn't an indicator of a product flaw. All batteries lose some of their ability to hold a charge over time after extended usage, whether it's an electric vehicle battery, a home energy battery, or a rechargeable AA battery.

How efficient is a franklinwh battery?

The FranklinWH battery has a roundtrip efficiency of 85 percent; this means that for every 10 kilowatt-hours (kWh) of electricity you put into the battery, you'll receive 8.5 kWh of output. In most cases, homes with an aPower will charge and discharge their battery every day. So, how long do FranklinWH batteries last?

Are Franklin home power systems safe?

Using extremely safe LFP battery, the Franklin battery system is safe and reliable with a 12-year warranty. The FranklinWH smartphone app, available on iOS and Android, allows you to monitor and control your Franklin Home Power system anytime, anywhere. You can select from various available energy-saving consumption modes.

How does Franklin home power work?

Franklin Home Power integrates solar, grid, battery storage, and generator, to maximize your solar ROI and increase energy efficiency. You can monitor and manage home energy generation and consumption in real time through the FranklinWH App.

Does Franklin home power have a 12-year warranty?

Using extremely safe LFP battery, the Franklin battery system is safe and reliable with a 12-year warranty. With a 13.6 kWh storage per aPower, Franklin Home Power is expandable to 204 kWh storage per aGate, which is flexible to meet different household energy needs.

How does the franklinwh aPower battery work?

The FranklinWH smartphone app, which controls the smart circuits and allows users to customize their FHP system to their needs. The aPower battery comes with its own inverter in a very nice-looking box, with a sleek design and a grouping of LEDs on the front that indicate the state of charge.

One aPower battery unit weighs in at 408 lbs and measures 45.3" x 29.5" x 11.4". It can be mounted on the wall or on the ground. The battery unit holds 13.6 kWh of lithium iron phosphate (LFP) battery cells. The unit can output 5,000 watts of continuous power and surge to 10,000 watts for 10 seconds.

Normally, a battery with a 10 kW charge rate should require a 10 kW PV system to feed it in order to ensure that it is not over-generated under any circumstances. However, given the fact that PV tends to produce less power than the maximum power, it makes sense to pair a 10 kW battery with an 11-12 kW PV system.
