

Uruguay wintech energy

Does Uruguay have a wind farm?

Sierra de los Caracoles wind farm. Wind power in Uruguay generates a rapidly growing proportion of the country's electricity mix. In 2014, Uruguay installed the most wind power capacity per capita in the world. Overall, the majority of Uruguayan electricity generation is derived from hydroelectric sources.

How did the wind energy programme work in Uruguay?

This funded the Uruguay Wind Energy Programme, which ran until 2012 and focused on policy reform and technical capacity building. The Wind Energy Programme supported the Government of Uruguay in creating an ambitious national policy on renewable energy.

Does Uruguay have a wind policy?

Uruguay's reforms provided the policy stability and technical expertise to kick-start wind investment, with the nation now receiving more than \$1 billion a year in investment for clean energy. The country has continuously exceeded its wind targets.

Why did Uruguay develop a wind power plant?

Uruguay's wind development was driven by a desire to increase energy security. The country had relied heavily on hydropower historically.

How much wind power does Uruguay have?

The country has continuously exceeded its wind targets. The government aimed to have 300 MW of installed wind capacity by 2015, which was increased to 500 MW as development beat expectations. Uruguay now aims to generate 38 percent of its electricity from wind by the end of 2017, more than doubling the current share.

Why does Uruguay export wind power to Argentina & Brazil?

Its proximity to Argentina and Brazil make for relatively easy electricity trade between the countries, and in 2016 Uruguay began exporting excess wind power generation to neighboring Argentina.
