

# Vatican City solar panel processing

One of the Vatican's most notable initiatives is the expansion of solar energy systems across key locations, including the entrance to the Vatican Museums and the Vignaccia area.

Pope Francis has unveiled plans for a solar plant that will let the Vatican City generate all its electricity from renewable sources. With an area of 121 acres or 0.44km<sup>2</sup> and a population of around 825, the Vatican City in Rome is the smallest independent state in the world by both area and population.

The Holy City has installed 2,400 photovoltaic solar panels to the top of one of the city's buildings. In doing so, the Vatican will reduce CO<sub>2</sub> emissions by 225 tons a year and save 80 tons of oil. The solar panels are not visible from the ground, but the angels in St. Peter's Basilica may have to wear sunglasses to fight off the glare from the ...
