How does Venezuela's economic policy affect energy consumption?

Venezuela's restrictive economic policies (Figure 3) have resulted in a decrease in inflation-adjusted GDP per capita, which has led to a decrease in energy consumption (Figure 4). Venezuela has the refining capacity to meet its domestic demand, but the country's refineries are in poor condition.

What type of electricity is produced in Venezuela?

Electricity in Venezuela is predominantly produced from hydroelectricity. Venezuela ranked 11th in the world for oil production in 2016; production has since fallen steeply. The largest oil company is Petróleos de Venezuela (PDVSA). Oil fields in the country include Bolívar Coastal Field, Boscan Field, Maracaibo Basin and Orinoco Belt.

Should Venezuela build a decarbonized electricity matrix?

However, there is a lack of insight about the economic and environmental opportunities of building a decarbonized electricity matrix in account of the existence of huge renewable energy resources. Fulfilling a balance between reconstructing Venezuela's historic electricity system and building a new decarbonized system is of major significance.

Why does Venezuela have a poor electricity system?

Since 2008 or even before, likely up to now, Venezuela has had an electric system in critical condition that is not able to satisfy the electricity demand, which has fallen because of the severe economic crisis, and offers very low-quality services.

Why is the Venezuela oil industry in turmoil?

Venezuela oil industry is in turmoil. Venezuela's oil rigs, which had been producing nearly 3 million barrels of crude oil a day in 2014, produce now less than a million barrels a day. In addition to the economic collapse of Venezuela, U.S. sanctions against the country made it almost impossible to route bank payments to Venezuela.

Why do Venezuelans need electricity?

Urgent humanitarian needs and the demands of Venezuelan citizens call for the restoration of electricity supplies as fast as possible, but also with a modern system that ensures low electricity prices that enable competition and economic growth. P. M. De Oliveira-De Jesus: Conceptualization, Writing and proofreading.
