

Vertical storage system Curaçao

How secure is storage on Curaçao Caribbean moving services?

Storage on Curaçao Caribbean Moving Services offers over 3000 sq. meters of secured warehouse facilities (including 30x20 ft containers) on an 8000 sq. meter fenced property on the island. With security systems and anti-theft and fire safety precautions set in place, your goods will be stored securely until you need them.

What are vertical storage solutions?

Vertical storage solutions are the best way to make use of every inch of warehouse space you have. We don't mean building out, we mean building up. With products like Vertical Lift Modules and automated storage and retrieval systems (ASRS) from our partners at Modula, we are able to recover up to an incredible 90% of the currently used floor space.

What is a modular vertical storage solution?

Created to make the most of available vertical space and save floor space at the same time, Modula automated vertical storage solutions are suited to any type of product, in any industry sector or environment, and can be customised to various payloads, heights, sizes and options.

Why should you choose Modula automatic vertical storage solutions?

Modula automatic vertical storage solutions are designed to save space and time and improve process efficiency. The automatic vertical tray warehouses were designed according to the "goods-to-man" principle: there is no need for operators to move around the warehouse to pick or refill your goods.

What is a vertical carousel storage system?

Vertical carousel storage systems maximize picking productivity by using the goods-to-person principle. Operators no longer have to spend time walking and looking for the parts they need. Instead, all parts are stored in a compact footprint and delivered directly to the workstation at the push of a button, eliminating search time.

How can a vertical carousel storage system improve picking productivity?

If you're looking for a way to optimize your parts storage, save space, and improve picking productivity, a vertical carousel storage system can help. The vertical carousel utilizes overhead vertical space to store more parts in a compact footprint, and its ergonomic design helps pickers work quickly and efficiently.

Market Overview: The global vertical storage system market is expected to grow at a CAGR of 5.5% during the forecast period from 2018 to 2030. The growth in this market can be attributed to the increasing demand for automated storage and retrieval systems from various end-use industries, such as automotive, industrial manufacturing, warehousing and logistics, and ...
