The phrases "battery generator" and "solar generator" are pure marketing -- effective marketing, but still out of touch with reality. I just need enough power to keep my fridge and freezer running as I have a lot of frozen meat stored. I would start by making sure your freezer is full -- if there is empty space, fill it with bottles of water.

I have a tri fuel generator but if that becomes a problem finding carbon fuels I went with a solar generator for redundancy. You don't have to use the solar panels. I went with two Jackery 1000 plus solar generators with two additional batteries on each. That's 5kWh total on each set up.
