BESS to reduce reliance on burning coal and importing electricity . Namibia currently imports up to 70% of its electricity from neighbours, predominantly generated by coal. Against that backdrop, the country is targeting renewables to be 70% of the generation mix by 2030, more than double the 30% it is today.

As the first utility-scale storage projects in Namibia, the Omburu BESS will provide the following benefits: o Surplus electricity from RE generation as well as cheaper electricity imports from ...
